Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The invention relates to a method of verifying access authorization for a voice telephony in a fixed work line or mobile telephone line as well as communications network with such authorization verification.

The prior art of record in combination or alone fails to teach or suggest these elements of independent claim 16 in combination with other elements. For example independent claim 16 has claim limitations such as analyzing the first voice signal via voice recognition algorithm when one of (a) before communication connection between the first subscriber and a second subscriber is established and (b) after the communication connection between the first subscriber and second subscriber is established, and if analyzing begins after the communication between the first subscriber and second subscriber is established then the first voice signal and a second voice signal of the second subscriber continues to be relayed, comparing the first voice signal with voice reference data record to determine an identity of the first subscriber, determining if the first voice signal is in the voice reference data and if the first voice signal is not in the voice reference data record then at least one communication effect occurs, the at least one communication effect including not establishing the communication connection, automatically interrupting the communications connection and generating an alarm in the communication connection, recording the first voice signal before and after communication connection to the second subscriber is established, assigning voice reference data record to the fixed network line or the

mobile telephone line, and recording a voice sample of the first subscriber and the second subscriber at regular intervals during the communication connection and checking the first and second voice signals with voice reference data record. For the above reasons, independent claim 16 and dependent claims 17-25 are allowable.

2. Claims 16-25 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melur Ramakrishnaiah whose telephone number is (571)272-8098. The examiner can normally be reached on 9 Hr schedule.
